Toagosei Co., Ltd.

Announcement of ISCC PLUS Certification Obtained for ATBS® at Kawasaki Plant

Toagosei Co., Ltd. (President and COO: Hidenori Kobuchi) is pleased to announce that it has acquired ISCC (*1) PLUS certification (*2) for ATBS® (Acrylamide Tertiary Butyl Sulfonic Acid) manufactured at its Kawasaki Plant using recycled or biomass-derived raw materials.

ATBS® is used as a raw material for water treatment agents, cosmetic ingredients, oil drilling chemicals, and other products, with Europe as its main market. As interest in chemical products made using sustainable raw materials grows, particularly in Europe, demand for ISCC PLUS-certified products is expected to increase. With this certification, we will establish a supply system that enables us to respond promptly to this demand and support customers' sustainable product development and raw material procurement.

This follows the ISCC PLUS certification we obtained in June 2025 for acrylic acid manufactured at our Oita Plant. Going forward, we will continue to expand the scope of certification to various downstream products made using acrylic acid or ATBS® as raw materials. By expanding our product lineup to meet customers' environmental needs, we will contribute to the realization of a sustainable society.

(*1) ISCC: International Sustainability and Carbon Certification, an international certification system for sustainability and carbon management.
(*2) ISCC PLUS: An international certification system that ensures sustainable raw materials, such as recycled or biomass-derived materials, are properly managed throughout the supply chain, including product manufacturing. With this certification, we are now able to sell certified products to which the sustainability attributes of these raw materials have been allocated under the mass balance approach (*3).
(*3) Mass balance approach: A management method recognized by ISCC PLUS that allows the share of biomass-derived raw materials used in production to be allocated to selected products, even when biomass-derived and other raw materials (e.g., petroleum-derived materials) are mixed.

1. Certified Sites and Products

Certified Sites	Products
Toagosei Co., Ltd. Kawasaki Plant	ATBS® (Acrylamide Tertiary Butyl Sulfonic Acid)
Toagosei Co., Ltd. Oita Plant	Acrylic Acid

2. Declaration Regarding ISCC PLUS Requirements

We, the Toagosei Group, hereby declare that we will comply with the latest ISCC regulations and adhere to ISCC PLUS requirements. Furthermore, we pledge not to engage in double counting related to environmental contributions.
