Toagosei Co., Ltd.

Toagosei Recognized as a DX-Certified Business Operator by the Ministry of Economy, Trade and Industry

Toagosei Co., Ltd. (Hidenori Kobuchi, President, COO and Representative Director) announces that it has been certified under the Digital Transformation (DX) Certification Program (*1) established by Japan's Ministry of Economy, Trade and Industry (METI), effective October 1, 2026.

(*1) The DX Certification Program is a government initiative established under the Act on Facilitation of Information Processing to certify businesses that meet the requirements of the Digital Governance Code formulated by METI and are deemed ready to promote DX.

DX initiatives at the Toagosei Group

Under its medium-term management plan, “Connect and Create 2028,” the Group has identified “Drive DX across all areas by leveraging digital technologies” as one of its key initiatives. The Group is working to transform its business operations and create new value through the use of digital technologies and data, with its production, R&D, sales, and administrative divisions working together. In production, we are advancing smart factory initiatives through the use of IoT and AI, helping to improve productivity, quality, and safety while ensuring a stable supply of products. In R&D, we are leveraging materials informatics, computational science, and other methods to enhance the efficiency and sophistication of our R&D activities through data-driven approaches. In sales, we are enhancing our sales activities by leveraging customer and market information. In administrative divisions, we are using digital tools, including generative AI, to streamline routine tasks and accelerate information sharing. In addition, we are promoting human capital development to foster employees capable of using data and digital technologies to solve operational challenges and drive transformation, with the aim of strengthening the Group’s overall capability to advance DX.

Future outlook

The Group regards DX as a key management foundation that supports the enhancement of corporate value and sustainable growth. Going forward, we will continue to drive business transformation through the use of data and digital technologies, while strengthening our competitiveness and creating new value, thereby contributing to the realization of a sustainable society.
