

## **Revision to the Price of Acrylic Monomers Products**

Toagosei Co., Ltd. hereby announces that it has decided to revise the selling price of the following products and has entered into negotiations with its customers.

### 1. Products and Price Revision Range

Acrylic Acid	: Increase of 40 yen per kg or more
Acrylic esters (acrylates)	: Increase of 70 yen per kg or more
Special acrylic esters (acrylates)	: Increase of 100 yen per kg or more

\*The above price revision does not reflect the impact of increased naphtha prices.

### 2. Timing of the Price Revision

Products shipped from May 1, 2026

### 4. Background to the Price Revision

The products have been facing increasing pressure on profitability due to significant rises in raw material, energy, and logistics costs driven by heightened tensions in the Middle East. In addition, deteriorating procurement conditions have forced production reductions, leading to continued cost increases associated with lower operating rates. These factors, together with rising repair and labor costs, have further intensified the pressure on profitability.

Despite our efforts to reduce costs and improve efficiency in production, these self-help measures alone have reached their limits. Under these circumstances, we have determined that revising the product prices is necessary.
